

AKHIL T V

☎ +91 7510114772 ✉ akhilthottekatt135@gmail.com 🔗 linkedin.com/in/akhil-t-v 📄 github.com/AKHIL572

PROFESSIONAL SUMMARY

Data Analyst with hands-on experience in data cleaning, exploratory data analysis, business insight generation, and interactive dashboard development. Proficient in Python, SQL, Power BI, and Excel. Skilled at translating complex datasets into clear, actionable business narratives. Experienced in building end-to-end analytical projects that drive data-informed decisions across business domains including telecom, retail, and financial services.

EDUCATION

B.Tech in Computer Science and Engineering

2021 – 2025

Vidya Academy of Science and Technology
APJ Abdul Kalam Technological University
CGPA: 8.24

TECHNICAL SKILLS

Programming & Querying: Python, SQL

Data Analysis: Data Cleaning, Exploratory Data Analysis (EDA), Feature Engineering, Trend Analysis

Visualization & BI: Power BI, Matplotlib, Seaborn, Excel (Pivot Tables, Charts)

Machine Learning (Supporting): Scikit-learn, Regression, Classification, Clustering

Databases & Tools: MySQL, Jupyter Notebook, Streamlit, Joblib, Git, GitHub

Libraries: Pandas, NumPy

WORK EXPERIENCE

Data Science Intern — Codec Technologies Pvt. Ltd.

Dec 2025 – Feb 2026

AICTE & ICAC Approved · Google for Education Partner

- Developed and deployed a Credit Risk Prediction system on a dataset of 1.3M+ records, achieving ROC-AUC of ~ 0.70 to help identify high-risk borrowers.
- Built a Predictive Maintenance system using NASA turbofan sensor data, achieving $R^2 \sim 0.71$ (MAE: 25.86) to predict Remaining Useful Life (RUL) of engines.
- Implemented time-series aware train/test splits using GroupKFold cross-validation to prevent data leakage.
- Deployed both end-to-end pipelines as interactive Streamlit web applications for real-world use.

Data Science Intern — Cognifyz Technologies

Dec 2024 – Jan 2025

- Cleaned and validated structured datasets using Python (Pandas) to ensure accuracy, consistency, and downstream reliability.
- Performed exploratory data analysis to identify trends, anomalies, and key patterns in structured datasets.
- Generated structured summaries and analytical reports to communicate insights clearly to stakeholders.
- Documented preprocessing workflows in Jupyter Notebook, ensuring reproducibility and transparency.

PROJECTS

Telecom Customer Churn Prediction & Analytics Dashboard

GitHub | Live App

- Analyzed 7,000+ customer records to identify churn drivers; found month-to-month contracts carry $\sim 42\%$ churn rate.
- Quantified monthly revenue at risk ($\approx \$139K$) to support data-driven retention strategy decisions.
- Built an interactive Power BI dashboard visualizing churn segments, KPIs, and customer risk distribution.
- Deployed a real-time Streamlit app allowing business users to estimate churn probability per customer.

Customer Lifetime Value (CLV) Prediction & Customer Segmentation

GitHub | Live App

- Processed 540,000+ transactional records and engineered RFM (Recency, Frequency, Monetary) features to segment customers.
- Confirmed Pareto principle: a small customer segment contributes the majority of revenue, guiding marketing prioritization.
- Predicted 6-month CLV using Gradient Boosting Regressor ($R^2 \approx 0.5+$), segmenting customers into High, Medium, and Low value tiers.

- Designed a Power BI dashboard to visualize revenue contribution, RFM insights, and customer segment behavior.

Restaurant Rating Prediction & Market Trend Analysis

[GitHub](#) | [Live App](#)

- Cleaned and analyzed 9,500 Zomato restaurant records; identified votes, price range, and online delivery as top rating drivers.
- Generated actionable business insights: restaurants with table booking and online delivery receive significantly higher ratings.
- Built a Power BI dashboard for market trend analysis and a Streamlit app for real-time rating prediction.

CERTIFICATIONS

- IBM Data Analyst Professional Certificate — Coursera
- IBM Data Scientist Professional Certificate — Coursera
- GenAI Powered Data Analytics Job Simulation — Tata iQ (Forage)
- Data Analytics Job Simulation — Deloitte
- YIP — Data Sciences and Future Technologies
